

### SOPRAVAP'R SELF-ADHESIVE VAPOUR BARRIER MEMBRANE

SOPRAVAP'R is a self-adhesive vapour barrier membrane composed of SBS modified bitumen and a nonslip tri-laminated woven polyethylene. This membrane is the ideal solution when a vapour barrier is to be applied directly on metal decks. The width (1.14 m/45 in.) is specially designed to match the top flutes of the deck, reducing waste and increase the coverage of each roll.

#### FEATURES

- Quick, easy-to-use silicone release film
- Self-sealing
- Provides temporary protection against inclement weather
- Nonslip
- No substrate board required
- Clean installation
- Each roll covers 500 sq. ft.
- 45 inches wide, matches deck top flute
- High tensile strength and puncture resistance
- 100% UV protected
- No primer required
- Ideal for mechanically fastened or cold applied systems
- Enhanced resistance to work crew traffic

# INSTALLATION INSTRUCTIONS

1 Roll out the SOPRAVAP'R membrane on the clean, dry metal deck. Peel back the first metre (3 ft.) of the silicone release film and adhere the membrane in place.

2 Hold the membrane tight and peel off the remaining silicone release film diagonally.

3 Install adjacent rolls of membrane in the same way, taking care to overlap the longitudinal joints by 7.5 cm (3 in.). Use a roller to seal the joints.

4 Where the ends of the rolls overlap (15 cm / 6 in.), install a metal plate\* to support the end laps between the flutes and ensure a perfect end lap seal.

\*Format: (15 cm x 106 cm / 6 in. x 42 in.)

5 The superior strength of the SOPRAVAP'R membrane provides added protection against heavy work crew traffic during installation. The nonslip surface allows for safer foot traffic.

If you have any questions about this product or its installation, please contact your SOPREMA representative.

SOPREMA contributes to environmental protection and sustainable construction by manufacturing high quality products that meet the highest environmental standards. The Ginkgo Biloba leaf is the symbol selected by Soprema to represent its ecological commitment.

6 Once the installation has been completed, the SOPRAVAP'R membrane provides temporary protection against inclement weather.
